ABOUT US 01

First Canadian O.M Company is a contracting firm established in **1988**, specializing in civil, building, and infrastructure projects across Yemen and the Middle East.

The company delivers projects from design to execution, relying on the experience and expertise of its engineering and project teams. Every project is executed efficiently, on time, and in compliance with international standards.

Our core services include:

- Civil and structural works.
- Buildings (residential, commercial, institutional).
- MEP systems (mechanical, electrical, plumbing).
- Infrastructure (roads, bridges, utilities, water networks, dams, irrigation).

All works are carried out according to project specifications and international codes, with an emphasis on quality, sustainability, and client satisfaction.

MISSION STATEMENT 02

OUR MISSION is to build sustainable and innovative infrastructure that meets today's needs without compromising the ability of future generations to meet their own. We are committed to delivering projects that are environmentally friendly, socially responsible, and economically viable.

VISION STATEMENT 03

To become a leading contracting and construction company recognized for excellence, innovation, and client-focused service, making a lasting impact on communities and infrastructure development.

CORE VALUES

04

- **INTEGRITY:**
  Conducting business with honesty and transparency.

- **QUALITY:**
  Ensuring excellence in every aspect of our work.

- **SAFETY:**
  Prioritizing the health and safety of our employees, clients, and the public.

- **INNOVATION:**
  Embracing new technologies and methods to improve efficiency and outcomes.

- **SUSTAINABILITY:**
  Committing to environmental stewardship in all our projects.

EXPERTISE &SERVICES 05

With our long and diverse experience, we offer a wide range of construction services, especially in civil and infrastructure projects.

Services include:

NO.	Field of Work/ Projects	Experience and Service offered
01	Road and Highway	• Design, Construction, and Maintenance
02	Water and Hydraulic structures	• Construction and Maintenance of all types of Dams (Concrete, earth, and stone). • Construction and maintenance of all types of water structures, including canals, weirs, irrigation network systems, water tanks, well drilling, and more.
03	Building and Structures	• Construction and Maintenance of Custom homes, villas, and apartment complexes, Office buildings, warehouses, huge Steel structures, etc.
04	Infrastructure projects	• Construction and Maintenance of infrastructure works, including sewerage networks, Water supply networks, Internal roads, etc.
05	Other Works and services	• Solar system projects. • Electrical works. • Mechanical works. • Security works.

PROCUREMENT &EXPEDITING 06

The Procurement and Expediting Department at **First Canadian O.M Company** provides professional support for all company projects, ensuring that materials, equipment, and services are delivered on time and meet the required quality standards.

The department manages all procurement activities, including:

- Purchasing and sourcing with market expertise
- Desk and shop expediting services
- Quality checks, inspections, and testing
- Logistics and traffic coordination

By maintaining structured procurement processes, the department optimizes resources, supports project schedules efficiently, and ensures smooth execution of all ongoing projects.

DETAILED ENGINEERING 07

First Canadian O.M Company provides full engineering and design services covering the following:

- **Buildings:** Architectural, structural, and MEP systems.
- **Civil and Structural Works:** Roads, bridges, and infrastructure.
- **Water and Wastewater:** Reservoirs, storage tanks, water networks, and sewage treatment.
- **Dams and Irrigation Systems:** Design and analysis for water retention and distribution.
- **Power Generation and Distribution:** Electrical design for networks and substations.
- **Transportation Engineering:** Roads, highways, and related structures.

The company maintains an experienced engineering team capable of delivering high-quality designs. Additional engineering and drafting resources can be mobilized quickly to meet increased workload requirements.

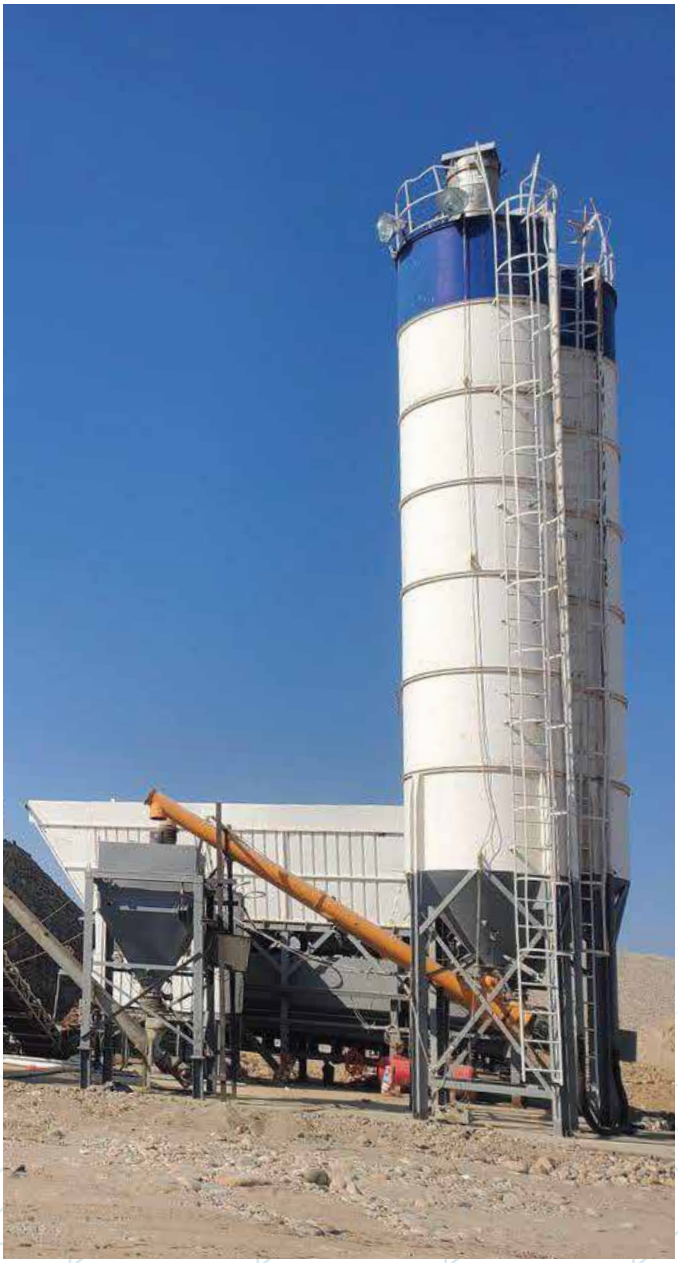

Using advanced CAD/CAE software, the team ensures integration between disciplines, delivering precise and efficient designs. Continuous research and development enhances quality, productivity, and innovative solutions during the engineering, procurement, and construction phases.

CONSTRUCTION 08

First Canadian O.M Company provides a comprehensive range of construction capabilities through teams of experienced construction specialists.

Drawing on extensive experience and a broad network of resources, the company is well-versed in local regulations and requirements, enabling efficient mobilization of equipment and crews for all projects.

The company has a proven track record of managing diverse construction workforces and ensuring a harmonious and productive work environment. Adaptability, inclusivity, and skilled project management enable successful execution across various types of projects and cultural contexts.

Fields covered include:

- Building Works.
- Civil Engineering.
- Mechanical & Electrical Works.
- Roads and Infrastructure.

CONSTRUCTION MANAGEMENT 09

First Canadian O.M Company's experience and resources allow for efficient mobilization of equipment and teams to execute projects on time and according to specifications.
The company has a proven track record in managing diverse workforces, ensuring collaboration and productivity across all teams.

Local labor is employed and trained whenever possible, adding value to projects and supporting the local economy.
Advanced management controls are used to plan, monitor, and execute large and complex projects, ensuring safety, quality, and timely completion.

Fields covered include:

- Building Works.
- Civil Engineering (Roads & Bridges).
- Mechanical & Electrical Works.
- Water & Irrigation Systems.

FACILITIES MANAGEMENT 10

First Canadian O.M Company has solidified its market presence by delivering top-notch facility and property management services across private, public, and governmental sectors. The company's property and facility management functions as a comprehensive 'one-stop-shop' for all aspects related to the management, maintenance, procurement, design, health and safety, as well as environmental considerations within the built environment.

Demonstrating adeptness and expertise, the company effectively addresses evolving challenges while maintaining a commitment to delivering high-quality and professional services.

Our pride lies in the highly qualified and experienced individuals on our team, equipped with robust executive and creative capabilities that enable them to tailor solutions to diverse industry requirements.

Whether clients seek a complete facilities management solution or consultancy services, we possess the skills and resources to support the entire life cycle of their portfolios.

We either procure or directly employ facilities services teams to fulfill our customers' on-site service needs. Beyond on-site teams, we also provide off-site resources like help desks and call centers tailored to meet our customers' specific requirements.

Our approach involves developing and customizing all services on a 'client by client' basis.

OPERATION AND MAINTENANCE SERVICES 11

First Canadian O.M Company specializes in providing comprehensive Operations and Maintenance (O&M) services to clients across various industries. Our O&M services encompass a wide range of activities, including the efficient management and upkeep of facilities, equipment, and infrastructure.

With a dedicated team of skilled professionals, we ensure the smooth functioning of our clients' assets, optimizing their operational performance and longevity.

From routine inspections and preventive maintenance to troubleshooting and emergency repairs, our O&M services are tailored to meet the unique needs of each client.

First Canadian O.M Company specializes in providing comprehensive Operations and Maintenance (O&M) services to clients across various industries. Our O&M services encompass a wide range of activities, including the efficient management and upkeep of facilities, equipment, and infrastructure.

With a dedicated team of skilled professionals, we ensure the smooth functioning of our clients' assets, optimizing their operational performance and longevity.

From routine inspections and preventive maintenance to troubleshooting and emergency repairs, our O&M services are tailored to meet the unique needs of each client.
By offering reliable and cost-effective solutions, we contribute to the sustained success of our clients, helping them achieve operational excellence and minimize downtime.

O&M fields covered include but are not limited to:

BUILDING INFORMATION MODELING (BIM) 12

First Canadian O.M Company utilizes Building Information Modeling (BIM), a data-oriented and intelligent digital representation of facilities, from which various object information can be extracted and analyzed according to project requirements.

Throughout the project lifecycle, information is generated and used to support all decision-making, improving the efficiency and quality of project delivery.
Our BIM Centers consist of engineers and IT professionals with extensive experience in supporting projects of varying sizes and complexity, including buildings, roads, ports, airports, and infrastructure projects.

The company offers complete BIM solutions, from requirement analysis and budgeting to technology selection, implementation, follow-up, and training.

This approach enables **First Canadian O.M Company** to capture, manage, and deliver most of the information, components, and processes related to a facility throughout its full lifecycle, ensuring high-quality and informed project execution.

MANAGEMENT SYSTEMS 13

Workplace Health and Safety Management

First Canadian O.M Company is committed to the occupational health and safety of all employees and subcontractors, ensuring a safe working environment where no one works in an unsafe manner. The company maintains the target of “zero harm” across all projects.

Environmental Management

The company believes that businesses are responsible for protecting the environment and achieving good environmental practices. All activities, operations, and projects are carried out in a sustainable manner. **First Canadian O.M Company** is committed to reducing environmental impact and continually improving environmental performance as an integral part of its strategy.

Environment, Safety, Health, and Sustainability (ESHS)

The company provides comprehensive Environment, Safety, Health, and Sustainability (ESHS) services to ensure a secure, sustainable, and socially responsible business environment. **First Canadian O.M Company** integrates industry best practices, cutting-edge technologies, and a team of experienced professionals to enhance operational efficiency, reduce environmental impact, and promote a culture of safety and well-being.

Quality Assurance (QA) and Quality Control (QC)

First Canadian O.M Company offers comprehensive QA and QC solutions to achieve and maintain the highest standards in all products and services.

- **Quality Assurance**

Delivering cost-effective, value-added services, complying with regulatory requirements, and continuously improving management systems.

- **Quality Control**

Implementing stringent inspections, testing protocols, and defect analysis with corrective actions.

Sustainability

The company supports the principles of the UN Global Compact regarding human rights, labor, environment, and anti-corruption. First Canadian O.M Company is committed to advancing sustainable practices, aligning with global agendas such as the Paris Climate Agreement and the UN Sustainable Development Goals (SDGs).

BUILDINGS SECTOR 14

Architecture Department

Architecture, as both an art and science, encompasses the intricate interplay of graphics, aesthetics, functionality, and spatial harmony.

First Canadian O.M Company adheres to this principle, recognizing its significance in creating remarkable spaces.

By thoroughly studying, analyzing, and engineering each project as a distinct and singular undertaking, the company crafts enduring and efficient structures that foster comfort for both individuals and their surrounding natural environment.

With a notable presence in its operating regions, **First Canadian O.M Company** has established a reputation for constructing distinguished and exceptional public and private buildings.

Our portfolio showcases a range of outstanding projects that have left a lasting impact on the built environment, reflecting our commitment to excellence and innovation.

MEP Engineering

This is the branch of engineering which is concerned with mechanical, electrical, and plumbing of any residential, or commercial buildings. It contributes to the implementation of the final deliverable that serves the individuals.

In the Mechanical section, we provide the HVAC services needed by any enclosed area, to distribute the cooled or heated air throughout the spaces, to suit the inhabitants, creating a perfect environment both for living and working. In the Electrical section, our engineers set up AC electrical systems that supply all appliances and electronics with the needed power.

Also, establishing the infrastructure of telecommunication networks that helps everybody stay connected with each other and the world.
The Plumbing section covers the essentials using water and sanitation through various systems that differ from each other to perfectly come up with the sought after results.

Clients Partnering with First Canadian O.M Company Can Benefit From:

- **Extensive Experience:**

We possess deep expertise and knowledge to thoroughly understand and address our clients' requirements.

- **Reliability:**

First Canadian O.M Company has a proven track record of consistently delivering projects on time and with the highest level of quality.

• Abundant Resources:

We have access to a vast array of resources, including plant and equipment, a skilled work-force, highly trained staff, and robust headq uarters support.

• Remote Location Capability:

First Canadian O.M Company has the capability and experience to work in challenging and remote locations, ensuring project success even in demanding environments.

• Engineering Support and Design Centers:

First Canadian O.M Company maintains engineering support and design centers across various locations, ensuring access to top-notch technical expertise.

• Contract Flexibility:

We provide flexibility in contract terms to accommodate the specific requirements and preferences of our clients.

Sector of Activities

- Buildings
- Networks and Infrastructures
- Civil Works
- Transportation, Roads & Bridges
- Water & Sewage Treatment Plants and Networks
- Dams and Irrigations
- Pipelines

INFRASTRUCTURE 15

WATER SERVICES

First Canadian O.M Company recognizes the increasing significance of water supply management and efficient delivery in light of ongoing population growth and rising energy costs. It is crucial to minimize wastage and maximize efficiencies in the water sector, particularly in developing regions.

First Canadian O.M Company is dedicated to prioritizing efficiencies, environmental considerations, and sustainable solutions. We collaborate closely with our clients to optimize infrastructure projects and deliver tailored solutions. **Our approach** involves providing expert advisory services, incorporating best practices, integrating cutting-edge technology, and implementing effective supply chain management techniques.

Expertise includes:

Water Supply

- Water resources and hydrogeology
- Water treatment
- Water storage structures

Sanitation

- Wastewater collection & treatment
- Wastewater reuse for plants and sludge treatment

Dams

- Storm water flood control
- Water storage

Irrigation

- Water supply for irrigation
- System design
- Landscape irrigation systems

DAMS AND IRRIGATIONS

Dams serve as crucial structures in arid and semi-arid regions, effectively retaining water and mitigating water scarcity issues throughout the year. In dry regions, dams play a vital role in water conservation by addressing seasonal shortages. Properly designed irrigation systems support sustainable agriculture and efficient use of water resources, helping communities optimize crop production and maintain reliable water supply for various uses.

Expertise includes:

- Storm water flood control
- Water storage
- Irrigation system design and implementation
- Landscape irrigation systems

PORTS

Marine engineering presents a demanding and ever-evolving work environment. **First Canadian O.M Company's** steadfast commitment to training and providing optimal working conditions has strengthened our workforce into a dedicated, experienced, and reliable team.

A considerable number of our staff members are certified professionals, and we assemble strong, committed teams to fulfill each client's specific requirements.

Our objective is to exceed customer expectations by delivering innovative and pragmatic engineering solutions that adhere to stringent quality standards and strict timelines.

TRANSPORTATION SERVICES

First Canadian O.M Company specializes in the successful delivery of large, complex transport projects in close collaboration with our clients, aiming to enhance society and improve the quality of life in communities.

Our transportation projects are driven by the latest concepts and techniques in sustainable development, striving to enhance social, economic, and environmental conditions.

One of our key advantages is our extensive plant and equipment resources, enabling us to mobilize efficiently to remote locations. Additionally, our flexible staff and workforce can be rapidly deployed, allowing **First Canadian O.M Company** to undertake projects in some of the most challenging e nvironments.

Long-term Commitment and Partnering:

We are committed to establishing long-term partnerships and offer options for ongoing collaboration, fostering sustained success in the projects we undertake.

Services include:

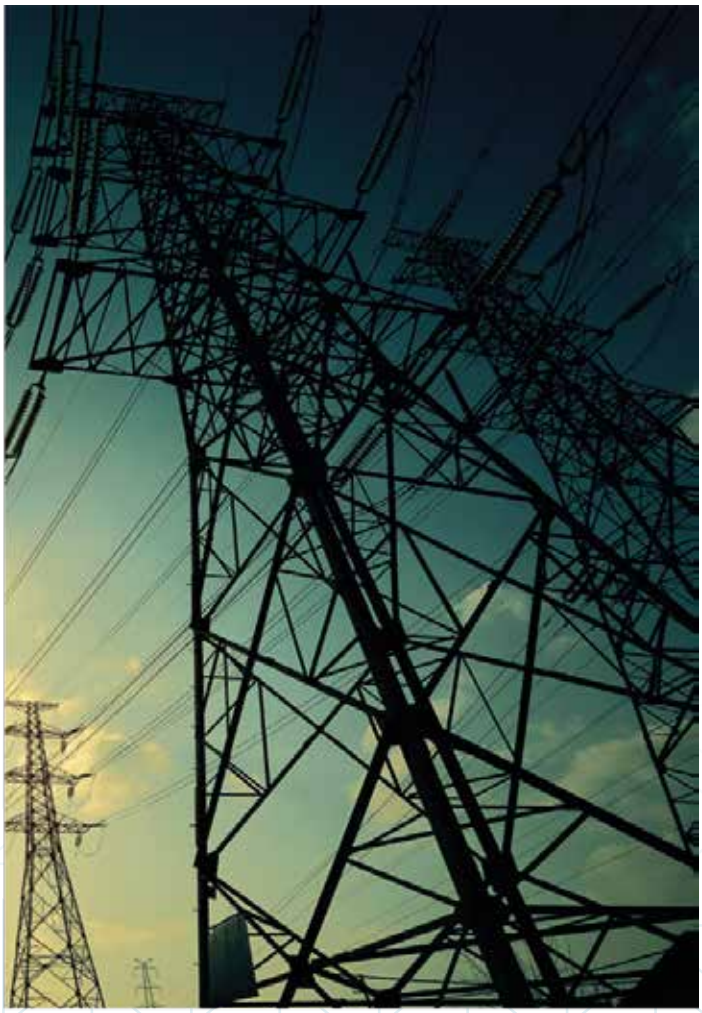

- Land Transportation: Roads, Highways, Urban & Rural Roads, Tracks & Public Car Parking, Bridges
- Marine Transportation
- Air Transportation

POWER SERVICES

First Canadian O.M Company continues to actively contribute to the successful delivery of power and energy projects worldwide, encompassing a wide range of initiatives, from renewable energy ventures to gas and fuel power plants. Our comprehensive services cater to diverse client needs in this sector.

This sub-department provides the following expertise:

Power Generation

- Steam plants.
- Diesel engine plants.
- Renewables.
- Gas turbines + dual cycle.

Power Delivery

- Overhead transmission network.
- Underground transmission network.
- Underground + overhead distribution network.
- Substations and ring main units.
- Electrical systems studies.
- Testing and commissioning.
- GIS assets management solutions.
- Utility automation.

EQUIPMENT CAPACITY 16

EQUIPMENT CAPACITY

First Canadian O.M Company maintains extensive equipment including plants, heavy machinery, instruments, and workshops, enabling efficient execution of large-scale projects.

The table below lists the key equipment of the company.

Equipment / Plant	QTY
1. Stationary Crushers	2
2. Mobile Mech. Crusher	1
3. Mobile Mech. Screen	2
4. Mechanical Sand Washer	1
5. Mix Concrete Plants	2
6. Concrete Pump Trucks	4
7. Concrete Pump (Stationary).	3
8. Concrete Mixer Trucks	13
9. Bulk Cement Truck	2
10. Asphalt Concrete Plant	2
11. Asphalt Paver	3
12. Asphalt Milling Machine	1
13. Asphalt Rollers	4
